

# Future Conversations: Train the Trainer Workshop

LONDON: January 15-17

- *Are you working in a community that faces challenges?*
- *Want to learn more on how to host conversations to become more resilient for the future together?*

The changes we're facing in the next two or three decades are complex, often contradictory, and can feel daunting. Research shows that our main strategies for coping with future changes are denial and avoidance. Moving people from detachment to active participant in a positive future is the key aim of the *Future Conversations project*. Future Conversations is programme of guided conversations and workshops to look at how we can do this together in community. See more at [www.futurescanning.org](http://www.futurescanning.org)
